Rules and Regulation for Certification Multi-site Organization

Issue Date: Sep 2021	Doc. No. IC201323	Vol. 0.01	Issue by: ICMC
----------------------	-------------------	-----------	----------------

1.0 INTRODUCTION

ICM Certifications Ltd. is a legal entity incorporated under the Companies Act 1956, in India. The main objective of the company is to offer independent third party certification to organizations against various Management System Standards; (e.g ISO 9001 (QMS), ISO 14001 (EMS), ISO 45001 (OHSAS), ISO/IEC 27001 (ISMS), ISO 20000-1 (ITMS), ISO 22000 (FSMS), HACCP, ISO 13485 (MDMS), ISO 31000, ISO 21001, ISO 29990, ISO 29991, ISO 29992, ISO 29993, ISO 10001, ISO 18788, ISO 20121, ISO 22301, ISO 26000, ISO 28001, ISO 37001, ISO 37301, ISO 39001, ISO 41001, ISO/IEC/IEEE 23026 and ISO 50001. ICM Certification (P) Ltd. is directly accredited by Accreditation Conformity Board for Certification Bodies (ACBCB)

2.0 Criteria for Granting Certification of a Multi-site organization:

2.1. General rules and regulation- (Document IC211303)

2.1.1. The rules & regulations specified in the document, IC201303 shall be applicable to all organizations applying for certification to ICMC

2.2. Rules and regulation- Multi site

2.2.1. For multi-site organizations the rules & regulations specified in this document, IC201303 shall be additionally applicable. All organizations seeking multi-site certification shall essentially comply with these.

2.3. Eligibility

2.3.1. Multi-site organization is defined as an organization having an identified central function (central office) at which certain activities are planned, controlled or managed and a network of local offices and branches (sites) at which such activities are fully or partially carried out.

2.3.2. A multi site organization need not be a unique legal entity, but all sites shall have a legal or contractual link with the central office and be subject to a common management system. The management system is laid down, established and subject to continuous surveillance and internal audits by the central office. This means that the central office has rights to ensure that the sites implement corrective actions when needed at any site.

2.3.3. The processes at all the sites have to be substantially of the same kind and have to be operated to similar methods and procedures. Where some of the sites under consideration conduct similar, but fewer processes than others, they may be eligible for inclusion provided that the site or sites, which conduct most processes or critical processes, are subject to full audit . All the sites should be in the same country.

2.3.4. Organizations, which conduct their business through linked processes in different locations, are also eligible for certification under multi-site. Where processes in each location are not similar but are clearly linked, the sampling plan shall include at least one example of each processes conducted by the organization (e.g fabrication of electronic component in one location, assembly of the same components – by the same company in several other locations)

2.3.5. The organization's management system shall be under a centrally controlled and administered plan and be subject to central management review. All the relevant sites including the central office shall be subject to the organization's internal audit program and all sites have been

audited prior to certification audit. The central office has established the management system in accordance with the relevant ISO or other standard and the whole organization meets the requirements of the standard including relevant legal regulations.

2.3.7. The organization should demonstrate its ability to collect and analyze data (system documentation and changes, management review, complaints, corrective actions, internal audit, legal requirements etc) from all sites including the central office and its authority and also demonstrate its authority and ability to initiate organization changes if required.

2.3.8. If all the sites of an organization where the activity subject to certification is performed are not ready to be submitted for certification at the same time, the organization shall be required to inform ICMC in advance of the sites that it wants to be included in the certification and those which are to be excluded.

2.4. Nonconformities.

2.4.1. Whenever any non-conformity is found at an individual site, either through the organization's internal auditing or auditing by ICMC, the organization shall investigate whether it leads to a system deficiency affecting all other sites or limited to the particular site only. If it is found a system deficiency correction and corrective action should be performed both at central office and at the individual sites. If the corrective action is limited to only the site where the nonconformity has been reported, the organization should be able to demonstrate to ICMC the justification for limiting its follow up corrective action.

2.4.2. At the time of the decision making process, if any site has nonconformity pending the certification shall be denied to the whole network pending satisfactory corrective action.

2.4.3. It shall not be admissible that, in order to overcome the obstacle raised by the existence of nonconformity at a single site, the organization seeks to exclude from the scope the "problematic site " site during the certification process.

2.5. Certification Document

2.5.1. ICMC shall issue the certificate after completing the procedural requirements (IC2013023) and the sites included in the certificate are either individually audited or audited as per a sampling scheme as defined in ICMC procedure.
